AnoMax is a range of pre-coated finishes on aluminium matching EURAS industrial standards. AnoMax stands for a new anodizing awareness that distinguishes itself by high warranties, great colour consistency and price economy of coil coating.

AnoMax coatings offer great flexibility for bending and rollforming resulting in an enormous panel versatility. Add the possibility to create your own individual colour and 'personal anodizing' is a fact.

Uniquely anodized

Personal anodizing colours

AnoMax collection

AnoMax Gloss level 30%
AnoMax ultra matt Gloss level 10%

Benefits over anodised aluminium

- Flexibility for bending and rollforming
- Colour stability
- Price economy
- Sustainability

Guidelines

- Install panels in the same direction to avoid reflection differences
- Order projects in one batch to avoid colour differences
- Many other colours available on www.euramax.eu/anomax

Choose sustainable pre-coated aluminium

The average use of recycling content in pre-coated aluminium alloys is double in comparison to real anodised aluminium alloys. A huge difference if you know that recycling requires only 5% of the energy of primary aluminium production.
