

## A living coating...

Zinc is a natural material with a fantastic appearance. Its weathering effect which sets in over time makes the material look alive. Inspired by this living material Euramax developed EuraZinc; a new Euramax finish that combines the weathering aesthetics of zinc with the advantages of pre-coated aluminium.

### EuraZinc

- Zinc design coating on aluminium
- Two layer PE (Polyester) system in high layer thickness
- Special zinc pigmented topcoat
- Real weathering properties
- Aluminium thicknesses from 0.3 up to 1.5 mm
- Price economy of aluminium
- Sustainable product
- No leaching of zinc

Newly painted

Weathering effect after  
three months

Colour - creativity - design
