

Rust...

also referred to as weathered steel or corten steel has a fantastic appearance. The rust effect sets in over time and makes the material look alive. Sometimes however, it is desired that the rust effect is directly present or does not weather any further. In those cases a rust or cortensteel design in pre-coated aluminium offers a perfect solution.

Rust in pre-coated aluminium

- Weathering effect directly present
- No continuation of corrosion
- No rust stains on nearby surfaces
- Customized rust designs possible
- Choose your own colour scheme
- Possibility to combine different aesthetics
- Available in various coating qualities
- Low weight - easier handling
- Price economy of aluminium
- Sustainable product

Colour - creativity - design
